

**AMENDMENTS TO THE CLAIMS:**

1. (Currently Amended) A transaction coordinating device for coordinating an insertion of a spot transaction based on a temporary contract being made without respect to a fixed

transaction based on a contract of predetermined term, said spot transaction comprising a transaction based on a one-time sales contract or based on an intermittent supply contract which is completed in a few times, said fixed transaction comprising a long-term stable offtake contract of predetermined term in which transportation schedules can be confirmed at least about a year before, said transaction coordinating device comprising:

a transportation adjusting portion for arranging an insertion of a cargo transportation relating to said spot transaction into a predetermined schedule of a cargo transportation relating to said fixed transaction of predetermined term, said insertion being arranged by adjusting the predetermined schedule of said cargo transportation relating to said fixed transaction of predetermined term; and

a conditions-of-transaction delivering portion delivering sales data of the spot transaction to participants in the spot transaction and to the transportation adjusting portion and delivering transportation adjusting data from the transportation adjusting portion to the participants in the spot transaction.

2. (Previously Presented) A transaction coordinating device as claimed in claim 1, further comprising:

a transportation data storing portion for storing data associated with said transportation, wherein

said transportation adjusting portion arranges an insertion of said cargo transportation of said spot transaction based on data associated with said transportation transmitted from said transportation data storing portion.

3. (Currently Amended) A transaction coordinating device as claimed in claim 1, further comprising:

    a transportation data storing portion for storing data associated with said transportation; and

~~a conditions-of-transaction delivering portion for delivering conditions relating to said spot transaction from a party on one side of said spot transaction with respect to a party on the other side of said spot transaction, wherein~~

    said transportation adjusting portion arranges an insertion of a cargo transportation of said spot transaction based on data associated with conditions of said spot transaction transmitted from said conditions-of-transaction delivering portion and said transportation transmitted from said transportation data storing portion.

4. (Currently Amended) A transaction coordinating device as claimed in claim 1, wherein:

    said transportation adjusting portion arranges an adjustment of cargo transportsations in a first transportation schedule by an insertion of a cargo transportation of said spot transaction without changing said first transportation schedule,

~~said first transportation schedule comprising shipping dates, unload dates, minimum days of navigation, and scheduled days of navigation for one or more freighters,~~

Application No. 10/070,358  
Attorney Docket: P-0258-US (KUR.ou)

said adjustment of cargo transportations comprising a first freighter in said first transportation schedule being allocated as an additional freighter and a remainder of freighters in said first transportation schedule being shifted sequentially to be allocated to an original purchaser of said first transportation schedule,

said transportation adjusting portion arranges an insertion of a cargo transportation of said spot transaction by changing said first transportation schedule only in an event that the cargo transportation adjustment is impossible,

said changing of said first transportation schedule comprising changing one or more of a date when a freighter ships, a date when a freighter unloads, and a number of days a freighter is under navigation,

said transportation adjusting portion arranges an insertion of cargo transportation of said spot transaction by changing a second transportation schedule within a certain range only in an event that the first transportation schedule changing is impossible,

said changing of second transportation schedule comprising one or more of moving a freighter from said second transportation schedule into said first transportation schedule and moving a freighter from said first transportation schedule into said second transportation schedule, and

said transportation adjusting portion arranges an insertion of cargo transportation of said spot transaction by changing another transportation schedule within a range to which said certain range is expanded only in an event that the second transportation schedule changing is impossible,impossible.

an adjustment or change being impossible if said adjustment or change would result in a failure to comply with terms of a fixed transaction.

5. (Currently Amended) A transaction coordinating device as claimed in claim 1,

wherein:

a commodity involved in said transaction comprises liquefied natural gas, and  
containers containing said liquefied natural gas transported on a sea or on a road are  
used in said ~~transportation~~transportation, and  
said cargo transportations are constrained by requirements of transporting liquefied  
natural gas.

6. (Currently Amended) A transaction coordinating device as claimed in claim 5 for  
coordinating an insertion of a cargo transportation of said spot transaction based on at least a  
predetermined number of days of operation and an actually required minimum number of  
days of operation of ~~said cases~~a freighter under navigation,

wherein said predetermined number of days of operation is greater than or equal to  
said actually required minimum number of days of operation.

7. (Currently Amended) A transaction coordinating system comprising:

~~the transaction coordinating device as claimed in claim 1; and~~1, further comprising:  
a terminal of a participant of said spot transaction connected to said portions of said  
transaction coordinating device via a communications circuit,

wherein said spot transaction is conducted between said terminal operated by a  
participant of said spot transaction and said portions of said transaction coordinating device.

8. (Currently Amended) A transaction coordinating method applicable at inserting a spot transaction based on a temporary contract being made without respect to a fixed transaction based on a contract of predetermined term, said spot transaction comprising a transaction based on a one-time sales contract or based on an intermittent supply contract which is completed in a few times, said fixed transaction comprising a long-term stable offtake contract of predetermined term in which transportation schedules can be confirmed at least about a year before,

    said method comprising:

        setting a schedule of cargo transportation relating to said fixed transaction; and,  
        concurrently, storing data associated with transportation in advance;  
        reading the data associated with said transportation in an event said spot transaction arises; and

        arranging an insertion of cargo transportation relating to said spot transaction by adjusting the schedule of cargo transportation relating to said fixed transaction based on the read data associated with said transportation.

9. (Currently Amended) A transaction coordinating method applicable at inserting a spot transaction based on a temporary contract made without respect to a fixed transaction based on a contract of predetermined term, said spot transaction comprising a transaction based on a one-time sales contract or based on an intermittent supply contract which is completed in a few times, said fixed transaction comprising a long-term stable offtake contract of predetermined term in which transportation schedules can be confirmed at least about a year before, said method comprising:

setting, in advance, a schedule of commodity transportation relating to said fixed transaction and storing data associated with transportation;

when a party on one side of said spot transaction inputs delivery conditions relating to said spot transaction with respect to a party on the other side of said spot transaction, reading data associated with said transportation and conditions of said spot transaction in an event that said spot transaction is organized based on delivery conditions of said spot

transaction; and

arranging an insertion of cargo transportation of said spot transaction by adjusting the schedule of commodity transportation of said fixed transportation, based on the read data associated with said transportation and the conditions of said spot transaction.

10. (Currently Amended) A transaction coordinating method as claimed in claim 8, wherein an arrangement of insertion of cargo transportation of said spot transaction is conducted sequentially by:

a first stage of arranging an insertion of cargo transportation of said spot transaction without changing said transportation schedule,schedule if such insertion is not impossible;

a second stage of arranging an insertion of cargo transportation of said spot transaction by changing said transportation schedule, only in an event that the first stage arrangement is impossible,impossible;

a third stage of arranging an insertion of cargo transportation of said spot transaction by changing another transportation schedule within a certain range, only in an event that the first and second stage arrangements are impossible,impossible; and

a fourth stage of arranging an insertion of cargo transportation of said spot transaction

Application No. 10/070,358  
Attorney Docket: P-0258-US (KUR.01)

by changing another transportation schedule within a range to which said range is expanded, only in an event that the first, second and third stage arrangements are impossible,impossible,

said first transportation schedule comprising shipping dates, unload dates, minimum days of navigation, and scheduled days of navigation for one or more freighters,

said first stage of insertion of cargo transportations comprising a first freighter in said first transportation schedule being allocated as an additional freighter and a remainder of freighters in said first transportation schedule being shifted sequentially to be allocated to an original purchaser of said first transportation schedule,

said second stage of changing said first transportation schedule comprising changing one or more of a date when a freighter ships, a date when a freighter unloads, and a number of days a freighter is under navigation,

said third stage of changing said second transportation schedule comprising one or more of moving a freighter from said second transportation schedule into said first transportation schedule and moving a freighter from said first transportation schedule into said second transportation schedule.

an adjustment or change being impossible if said adjustment or change would result in a failure to comply with terms of a fixed transaction.

11. (Currently Amended) A transaction coordinating method as claimed in claim 8,  
whereinwherein:

a commodity involved in said transaction comprises a liquefied natural gasgas, and containers containing said liquefied natural gas transported on a sea or on a road are

used in said transportation, and

said cargo transportations are constrained by requirements of transporting liquefied natural gas.

12. (Currently Amended) A transaction coordinating method as claimed in claim 11 for adjusting an insertion of cargo transportation of said spot transaction based on at least a predetermined number of days of operation and an actually required minimum number of days of operation of said containers, a freighter under navigation,

wherein said predetermined number of days of operation is greater than or equal to said actually required minimum number of days of operation.

13. (Currently Amended) An information A computer-readable recording medium on which is stored a program of instructions for inserting a spot transaction based on a temporary contract, said temporary contract being made without respect to a fixed transaction based on a contract of predetermined term, said spot transaction comprising a transaction based on a one-time sales contract or based on an intermittent supply contract which is completed in a few times, said fixed transaction comprising a long-term stable offtake contract of predetermined term in which transportation schedules can be confirmed at least about a year before, which program when executed causes the enactment of the steps of: reading previously stored data associated with transportation in an event that said spot transaction arises, and

adjusting an insertion of cargo transaction relative to said spot transaction with respect to a schedule of cargo transportation relative to said fixed transaction of predetermined term, based on the read data associated with said transportation, transportation, said adjusting of cargo transportations comprising a first freighter in said schedule, being allocated as an additional freighter and a remainder of freighters in said schedule being, shifted sequentially to be allocated to an original purchaser of said schedule.

14. (Currently Amended) An information A computer-readable recording medium on which is stored a program of instructions for inserting a spot transaction based on a temporary contract, said temporary contract being made without respect to a fixed transaction based on a contract of predetermined term, said spot transaction comprising a transaction, based on a one-time sales contract or based on an intermittent supply contract which is, completed in a few times, said fixed transaction comprising a long-term stable offtake, contract of predetermined term in which transportation schedules can be confirmed at least, about a year before, wherein the program is stored for executing, on a digital device, steps of: delivering conditions relative to said spot transaction from a party on one side of said spot transaction with respect to a party on an other side of said spot transaction; reading previously stored data associated with a transportation and conditions of said spot transaction in an event that said spot transaction is organized based on the delivering conditions of said transaction; and adjusting an insertion of a cargo transportation relative to said spot transaction with respect to a previously set schedule of cargo transportation relative to said fixed transaction

Application No. 10/070,358  
Attorney Docket: P-0258-US (KUR.011)

based on the read data associated with said transportation and the contracts of said spot

transaction.transaction.

said adjusting of cargo transportations comprising a first freighter in said schedule  
being allocated as an additional freighter and a remainder of freighters in said schedule being  
shifted sequentially to be allocated to an original purchaser of said schedule.

15. (Currently Amended) An informationcomputer-readable recording medium as claimed in claim 13, wherein the program executes the adjustment of the insertion of cargo transportation of said spot transactions sequentially by:

a first step of adjusting the insertion of the cargo transportation of said spot transaction without changing said transportation scheduleschedule;  
a second step of adjusting the insertion of the cargo transportation of said spot transaction by changing said transportation schedule, only in an event that the first step is impossible, said changing of said transportation schedule comprising changing one or more of a date when a freighter ships, a date when a freighter unloads, and a number of days a freighter is under navigation;

a third step of adjusting the insertion of the cargo transportation of said spot transaction by changing another transportation schedule within a certain range, only in an event that the second step is impossible, said changing of said another transportation schedule comprising one or more of moving a freighter from said another transportation schedule into said transportation schedule and moving a freighter from said transportation schedule into said another transportation schedule; and

a fourth step of adjusting the insertion of the cargo transportation of said spot transaction by changing another transportation schedule within a range to which said certain range is expanded, only in an event that the third step is impossible.

an adjustment or change being impossible if said adjustment or change would result in a failure to comply with terms of a fixed transaction.

16. (Currently Amended) An information recording medium as claimed in claim 13, wherein a commodity of said transaction comprises a liquefied natural gas and containers containing said liquefied natural gas transported on a sea or on a road are used in said transportation, transportation, and said cargo transportations are constrained by requirements of transporting liquefied natural gas.

17. (Currently Amended) An information A computer-readable recording medium as claimed in claim 16 for adjusting the insertion of cargo transportation of said spot transaction as based on at least a predetermined number of days of operation and an actually required minimum number of days of operation of said containers-a freighter under navigation.

wherein said predetermined number of days of operation is greater than or equal to said actually required minimum number of days of operation.

18. (Currently Amended) A computer-readable program product containing a computer program for inserting a spot transaction based on a temporary contract, said temporary

Application No. 10/070,358  
Attorney Docket: P-0258-US (KUR.011)

contract being made without respect to a fixed transaction based on a contract of predetermined term, said spot transaction comprising a transaction based on a one-time sales contract or based on an intermittent supply contract which is completed in a few times, said fixed transaction comprising a long-term stable offtake contract of predetermined term in which transportation schedules can be confirmed at least about a year before, wherein:said program product comprising:

a means for reading previously stored data associated with transportation in an event said spot transaction arises,arises; and

a means for adjusting an insertion of cargo transportation relative to said spot transaction with respect to a previously set schedule of one or more of single and plural cargo transportations relative to said fixed transaction based on a read data associated with said transportation,

said adjustment of cargo transportations comprising a first freighter in said previously set schedule being allocated as an additional freighter and a remainder of freighters in said previously set schedule being shifted sequentially to be allocated to an original purchaser of said first transportation schedule.

~~are provided in order to be executed in a computer.~~

19. (Currently Amended) A computer-readable program product for inserting a spot transaction based on a temporary contract, said temporary contract being made without respect to a fixed transaction based on a contract of predetermined term, said spot transaction comprising a transaction based on a one-time sales contract or based on an intermittent supply contract which is completed in a few times, said fixed transaction comprising a long-

Application No. 10/070,358  
Attorney Docket: P-0258-US (KUR.011)

term stable offtake contract of predetermined term in which transportation schedules can be confirmed at least about a year before, said program product comprising: wherein:

a means of delivering conditions relative to said spot transaction from a party on one side of said spot transaction with respect to a party on an other side of said spot

transaction, transaction:

a means for reading previously stored data associated with transportation and conditions of said spot transaction in an event that said spot transaction is organized based on the delivered conditions of said spot transaction, transaction; and

a means for adjusting an insertion of cargo transportation relative to said spot transaction with respect to a schedule of one or more of single and plural cargo transportations relative to said preset fixed transportation based on the read data associated with said transportation and the conditions of said spot transaction, transaction,

said adjustment of cargo transportations comprising a first freighter in said previously set schedule being allocated as an additional freighter and a remainder of freighters in said previously set schedule being shifted sequentially to be allocated to an original purchaser of said first transportation schedule.

~~are provided in order to be executed in a computer.~~

20. (Currently Amended) A computer readable program product as claimed in claim 18, wherein the program executes sequentially by:

a first means for adjusting the insertion of a cargo transportation of said spot transaction without changing said transportation schedule;

a second means for adjusting the insertion of a cargo transportation of said spot

Application No. 10/070,358  
Attorney Docket: P-0258-US (KUR.011)

transaction by changing said transportation schedule, only in an event that the first means adjustment is impossible, said changing of said transportation schedule comprising changing one or more of a date when a freighter ships, a date when a freighter unloads, and a number of days a freighter is under navigation;

a third means for adjusting the insertion of a cargo transportation of said spot transaction by changing another transportation schedule within a certain range, only in an event that the second means adjustment is impossible, and

said changing of another transportation schedule comprising one or more of moving a freighter from said another transportation schedule into said transportation schedule and moving a freighter from said transportation schedule into said another transportation schedule; and

a fourth means for adjusting the insertion of a cargo transportation of said spot transaction by changing another transportation schedule within a range to which said certain range is expanded, only in an event that the third means adjustment is impossible, an adjustment or change being impossible if said adjustment or change would result in a failure to comply with terms of a fixed transaction.

21. (Currently Amended) A program product as claimed in claim 20, wherein a commodity involved in said transaction comprises a liquefied natural gas and containers containing said liquefied natural gas transported on a sea or on a road are used in said transportation, transportation, and

said cargo transportations are constrained by requirements of transporting liquefied natural gas.

22. (Currently Amended) A program product as claimed in claim 21 for adjusting an insertion of cargo transportation of said spot transaction, wherein said adjusting is as based on at least a predetermined number of days of operation and an actually required minimum number of days of operation of said containers-a freighter under navigation,

wherein said predetermined number of days of operation is greater than or equal to  
said actually required minimum number of days of operation.

23. (Currently Amended) A transaction coordinating system comprisingcomprising:  
the transaction coordinating device as claimed in claim 22; and  
a terminal of a participant of said spot transaction connected to said transaction coordinating device via a communications circuit, wherein  
said spot transaction is conducted between said terminal operated by the participant of said spot transaction and said transaction coordinating device.

24. (Currently Amended) A transaction coordinating system comprisingcomprising:  
the transaction coordinating device as claimed in claim 33; and  
a terminal of a participant of said spot transaction connected to said transaction coordinating device via a communications circuit, wherein  
said spot transaction is conducted between said terminal operated by the participant of said spot transaction and said transaction coordinating device.

25. (Currently Amended) A transaction coordinating system comprisingcomprising:

the transaction coordinating device as claimed in claim 44; and  
a terminal of a participant of said spot transaction connected to said transaction  
coordinating device via a communications circuit, wherein  
said spot transaction is conducted between said terminal operated by the participant of  
said spot transaction and said transaction coordinating device.

26. (Currently Amended) A transaction coordinating system ~~comprising~~comprising:  
the transaction coordinating device as claimed in claim 55; and  
a terminal of a participant of said spot transaction connected to said transaction  
coordinating device via a communications circuit, wherein  
said spot transaction is conducted between said terminal operated by the participant of  
said spot transaction and said transaction coordinating device.

27. (Currently Amended) A transaction coordinating system ~~comprising~~comprising:  
the transaction coordinating device as claimed in claim 66; and  
a terminal of a participant of said spot transaction connected to said transaction  
coordinating device via a communications circuit, wherein  
said spot transaction is conducted between said terminal operated by the participant of  
said spot transaction and said transaction coordinating device.
